PROFESSIONAL SUMMARY

- 1+ years of progressive experience in Software Quality Assurance with Good knowledge of Java, Selenium and its applications.
- Develop and maintain an automation framework and scripts to drive quality and efficiency improvements in the application.
- Seeking a position in an environment that emphasizes teamwork and encourages learning by doing.

EMPLOYMENT HISTORY

Automation Test Engineer, Wipro. Chennai, Tamil Nadu

Apr. 2019 – Present

- As an Automation Tester, we first identify, analyze, and document problems with test plans, scenarios, and document the solution. Later create an automated script using Java, Selenium, and other languages based on the problem complexity.
- Design test plans, scenarios, scripts, or procedures.
- Develop testing programs that address areas such as database impacts, software scenarios, regression testing, negative testing, error or bug retests, or usability.
- Provide feedback and recommendations to developers on software usability and functionality.
- Document software defects, using a bug tracking system, and report defects to software developers.
- Monitor bug resolution efforts and track successes.

Technical tools

- Java, Selenium, Eclipse,C, C++,HTML,SQL,Angularjs,Python
